Education

PG-Diploma in Advance Computing
Specialization: C-DAC
Knowledege Park (CDAC-KP)
2016 - 2017 |Bengaluru (Karnataka)

Bachelor of Engineering (CGPA: 6.9)
MPCT College Gwalior

Project

Domain: Ecommerce, Telecom **Client Name**: British Telecom

ECOMMERCE:-British Telecom is one of the leading Telecommunication company headquartered in London, United Kingdom providing the most complete UK Broadband, phone lines, mobile products, BT TV, web hosting, online security and networked IT services for both home and corporate segment. This application involves the verification of a customer's eligibility for the service, capture of customer details and their selected product, offering best possible promotions, their payment for the initial charges and the configuration of their subsequent payment methods. This application helps in easy addition of new product pages in the journey by simple SQL statements rather than writing repeated code usage. Springs are used to trigger web service calls to fetch data from other external system components.
